will be seen that the levy of 3% mills for general county purposes gives the ounty for paying all the current county expenses less than one-sixteenth o that a nount, and from this less than ten thousand dollars will be realized, This is the fund out of which the sheriff is supposed to get all his big money, and when we knew that the other officers get their salaries from it, and the pay for feeding from twenty to forty prisoners comes from the san source, as well as the pay for othe work done and supplies furnished the ounty, it will be readily seen that the sheriff cannot get any very large amount from it. The other fund out of which the sheriff is supposed to receive his princely fees is the court fund, for which there is sevied five mills. From the levy for this fund perhaps thirteen thousand deliars will be realized. Out of this the grand jurors, the petit jur oras, the builiffs, the interpreter, the court oriers, the district attorney, and other officials are paid, and they perhaps draw about two-thirds of said amount. So when the expenses of the deputy sheriffs in running all over the county in subposnaeing grand and petit jurors and witnessess is taken out of the fees of the sheriff.
